President Roosevelt has impresthe El Paso republicans with the fact that he brooks no throat. When cerrain machine republicans telegraphed that Pat. Garrett's appointment would cost him thirty-ris votes in the next republican convention, he sent Garrett's name to the senale at once for the positica of collector of the port at E. Paso. This action is to be commended as a deserved rebuke to a crowd of conticians who have long regarded the federal appointments at that city as their personal property.

SUCCESSFUL ADVERTISING. The advertiser who considers his money spent in advertising as an li estment, usually succeeds to making it pay, because he treats this expense as an investment, conservatively and showedly. He does not expect that every dellar apent in printer's ink will bring him back two, by the time th ink on the paper becomes dry. He is satisfied if at the end of the year

certain amount spent in adverti has increased the business over year ago by 20 per cent, while, if b has been so fortunate as to double his business, then he congratulates bimself upon his good fortune. Amons the successful advertisers today the are to be found few who have reache this point by a chance gamble in ac vertising. They have always climithe ladder of anness, round by conby conservative advertising and in proportionately, as the Investment has made their business grow.
